

TOPS MARKET LEWISTON

Lewiston, New York

Owner / Client: Dimino's Lewiston Market, Inc.

Area: 45,000 square feet

Cost: \$ 6.0 million

Utilizing a unique design of precast panels, TRM Architect created a new supermarket for the Village of Lewiston. Built within close proximity to a village park and as a gateway business to the downtown Lewiston business district, the new market incorporated exterior design features unique to its location, as well as the latest interior décor and layout criteria.

Tops Lewiston, a franchise location, is an example of the successful integration of corporate operations, interior design, and store planning with the personalized touch of an individual owner. Throughout the project planning and design phases, multiple concepts were seamlessly worked into the overall scheme as they were developed and issued by Tops corporate directors.

Also of note is the fact that this Tops Lewiston represents the most recent project TRM and Dimino have collaborated on. For over two decades, both family operated companies have enjoyed a successful professional and personable relationship. Having completed the first Tops Lewiston together, the partnership worked on various remodels and updates at this store location before deciding to move forward with a new, more contextual store, while still utilizing modern equipment, interior décor, and store planning strategies.

Town Board officials, adjacent property and business owners, as well as local residents praised this community based project for its commitment to enhancing the adjacent town park, the contextual streetscape, and pedestrian friendly accessibility.

“Tom [Moscati] and his staff made you feel like you were family no matter what size the project was, from a Three Million Dollar remodel to an Eight Million Dollar new build.”

Anthony P. Di Mino President, Di Mino's Lewiston Market, Inc.
