

PLANET HOLLYWOOD
MIAMI

Miami, Florida

Owner / Client: Planet Hollywood International

Area: NA

Cost: NA

Planet Hollywood and TRM have enjoyed a professional relationship spanning several years, making TRM the logical choice when Planet Hollywood International decided to remodel their Miami location.

Positioned within the Miami Streets of Mayfair shopping district, PHI commissioned TRM to renovate the interior and redesign the exterior to take better advantage of this prime location. Both the first and the second floor were completely remodeled to update the restaurant to the latest layout design concepts while maintaining the well-known film industry theming. Due to Planet Hollywood's desire to complete the renovations quickly so as to reopen as soon as possible, the entire project was completed under a fast-track schedule.

Exterior renovations included the addition of windows on the second floor to increase patron viewing and streetscape visibility. A new exterior bar was also added, complete with an outdoor café concept to take advantage of Miami's beautiful climate.

Special considerations were also given to Dade County hurricane requirements such as fenestration concerns and minimum pounds-per-square-foot wind pressures the building should withstand when designing the exterior façades.

"I have received numerous compliments from our contractors, building officials and other consultants on [TRM's] professionalism and high quality of construction documents."

Former Vice President of Planning Planet Hollywood International
